

Caleb Easton

AI-Assisted Development · QA · Technical & Systems Game Design

Boston, Massachusetts · Open to on-site in Massachusetts or remote · caleb@appshapes.com · github.com/CalebEaston

SUMMARY

Game design graduate, now working in AI-assisted development: designed and runs a multi-agent Claude Code workflow that merged 208 pull requests on a live K-12 learning platform in under a month. Brings a game designer's eye for systems and feel to triage and QA. Seeking junior full-stack or AI-assisted development roles.

SKILLS

AI-Assisted Development: Claude Code · Multi-agent workflow design · Custom skills · Specifying and verifying AI-written work

Game Development: Unreal Engine · Blueprints (visual scripting) · Unity · Machinations

QA: Bug triage · Hands-on testing on a development site · Directing AI tester sessions

Tools: Version control (Git, GitHub, Perforce) · Project management (Trello, Jira, ClickUp) · Google Sheets · Excel

Currently learning: C# (through a Unity project) · C++

EXPERIENCE

ThinkTech - Leading ed-tech company behind a PHP / Vue / MySQL K-12 learning platform

Junior Full-Stack Developer · 09/2026 - Present · Remote

Stack: Claude Code · GitHub · Trello

- Designed a multi-agent Claude Code workflow (coordinator, implementers, AI testers, support) and grew it to eight sessions within the first month.
- Directed 208 merged pull requests through it in under a month: about 180 bug fixes across 136 Trello cards.
- Triage the AI testers' bug reports and dispatched fixes in batches via a custom `/dispatch` skill that files Trello cards.
- Directed about 30 security fixes, about 20 of them closing gaps in data isolation between school districts.
- Added a blocking AI-review rule that database migrations must be safe at production scale, after a migration crashed a production deploy.
- Checked fixes by hand on the development site for look and feel, on top of the AI testers' functional checks.

New City Micro Creamery

Shift Manager · 2022 · Hudson, MA

Whole Foods Market

Floater · 2021 - 2022 · Wellesley, MA

Fun @ Games

Assistant Manager · 2018 - 2020 · Framingham, MA

PROJECTS

Rattles & Rayguns - Arena shooter: a rattlesnake gunslinger holds a frontier town against alien waves

itch.io · 07/2026

Stack: Unreal Engine 5.6 · Blueprints

- Built a modular Blueprint weapon system: new guns are children of a base weapon, set by variables, with no per-weapon logic.
- Generalized shared behavior into the base Blueprint, such as how a weapon spawns in the player's hands and how many projectiles fire per shot, so new weapons plugged in without changing it.

- Owned the weapons system as one of 6 designers alongside 4 artists, on a Full Sail capstone built and released in one month.

Weekly Quest Log - Gamified task system that resets itself every week

[Repo](#) · [Sheet](#) · 10/2025

Stack: Claude Code · Google Sheets

- Designed a task system as a game progression loop: main quests, side quests and events, with XP from 25 to 100 by effort.
- Specified a weekly reset of quests and earned XP on a timed trigger, implemented by Claude Code in Google Apps Script.

EDUCATION

Full Sail University - Winter Park, FL

B.S. Game Design · Graduated 07/2026
