

Caleb Easton

Systems & Technical Game Design · Moving into Full-Stack Development

Boston, Massachusetts · caleb@appshapes.com · github.com/CalebEaston

SUMMARY

{{SUMMARY}}

SKILLS

Game Development: Unreal Engine 5.6 · Blueprints · Unity · Machinations

Languages: Blueprints (Unreal visual scripting)

AI-assisted development: Claude Code — specifying, reviewing, and integrating AI-written implementations

Tools: Perforce · Git · ClickUp · Google Sheets · Excel

Practices: Team-based development · Cross-discipline collaboration

Currently learning: C# · TypeScript · Nuxt 4 / Vue 3 · PHP

PROJECTS

Rattles & Rayguns — Arena shooter: a rattlesnake gunslinger holds a frontier town against alien waves

itch.io · 07/2026

Stack: Unreal Engine 5.6 · Blueprints

- Built a modular weapon system in Unreal Engine 5.6 Blueprints, letting a designer create a new gun by setting variables on a child of a base weapon Blueprint instead of writing per-weapon logic.
- Generalized weapon behavior into that base Blueprint — how a weapon spawns in the player's hands, how many projectiles fire per shot — so new weapons plugged in without modifying the shared system.
- Owned the weapons system as one of 6 designers working alongside 4 artists, on a Full Sail capstone built and publicly released within a single month.

A2B — Solo first-person parkour prototype in Unreal

[Build](#) · 09/2025 – 12/2025

Stack: Unreal Engine · Blueprints

- Built the movement and feel systems in Blueprints as a solo project, including a mantle, head-bob, and sound design.
- Implemented a settings menu persisting FOV, mouse sensitivity, and head-bob across sessions, on reusable button and slider widgets shared by the pause, settings, and win screens.
- Designed three test levels and a level loader to exercise the movement systems in isolation.
- Delegated the wall-run to Claude Code after several partial rewrites failed to make it feel intuitive, specifying the target behavior and reviewing the result into the build.

Weekly Quest Log — Gamified task system that resets itself every week

[Repo](#) · [Sheet](#) · 10/2025

Stack: Google Apps Script · JavaScript · Google Sheets

- Designed a personal task system as a game progression loop, tiering work into main quests, side quests, and events with XP scaled to effort from 25 to 100 per task.
- Automated the weekly reset in Google Apps Script, clearing quest completion state and the XP derived from it on a time-driven trigger.
- Hardened the daily day-off sync against silent failure, checking for a range protection before writing and rethrowing so errors surface in the Apps Script execution log.

Camo Grind Tracker — Completion feedback system for the weapon-camo grind in Black Ops 6

[Sheet](#) · 11/2024

Stack: Google Sheets · Conditional formatting

- Modeled the full completion matrix across nine weapon categories and four camo tiers, with per-tier rollups driving the section states.
- Designed per-item feedback so marking a camo complete flips its row from red to green and rewrites its status text, making progress readable at a glance.
- Built section-level completion signalling that recolors an entire tier once its last weapon is finished, so a closed-out set is unmistakable.

EXPERIENCE

AppShapes — Software development studio taking on client engineering work

Junior Full-Stack Developer · Starting 09/2026 · Boston, MA

Stack: TypeScript · Nuxt 4 / Vue 3 · PHP · MySQL · AWS

- Incoming scope: full-stack contract work on ThinkTech, a multi-tenant K-12 learning platform, paired with the lead developer across front end and back end.

New City Micro Creamery

Shift Manager · 2022 · {{City, State}}

- Managed shifts as the on-duty lead over roughly four months {{— add: staff per shift, and one thing you owned (open/close, cash handling, scheduling, training)}}.

Whole Foods Market

Floater · 2021 – 2022 · {{City, State}}

- Covered whichever department needed staffing that day {{— add: which departments, and anything you were specifically trusted with}}.

Fun @ Games

Assistant Manager · 2018 – 2020 · {{City, State}}

- Supervised floor staff and daily operations as assistant manager {{— add: team size, what you owned, and anything you measurably improved}}.

EDUCATION

Full Sail University — Winter Park, FL

B.S. Game Design · Graduated 07/2026

- **Relevant coursework:** {{Pull the exact titles from your transcript. Known themes to look for: producing / production for the games industry, and the several team-based development courses.}}
- **Capstone:** Shipped *Rattles & Rayguns*, a team game released publicly on itch.io.

CERTIFICATIONS & TRAINING

- {{NOT YET DISCUSSED — any certifications, bootcamps, or substantial online programs? If none, delete this section.}}

VOLUNTEER & COMMUNITY

- {{NOT YET DISCUSSED — any open-source contributions, mentoring, game jams, or community organizing? If none, delete this section.}}
